PROFILE SUMMARY

Frontend developer with **3+ years** shipping production web applications, from consumer-facing platforms to internal operations tools. I own features end to end – React/TypeScript on the front end, FastAPI/Node on the back end, and the AWS infrastructure that connects them. My recent work spans role-based access control, real-time features, and AI-assisted workflows including RAG pipelines on AWS Bedrock, always with an eye toward keeping applications fast and maintainable as they scale.

EXPERIENCE

Intellioid Private Ltd

May 2024 – Present

Frontend Developer

- Build and maintain client-facing web applications end to end using **React.js, TypeScript, and Tailwind CSS**, working directly with clients to turn requirements into shipped features
- Designed **role-based access control and multi-tenant permission systems** used across several client projects, including protected routes and permission-aware UI
- Added real-time functionality (chat, notifications, live updates) with **Socket.io**, and integrated AI-assisted features using **FastAPI and AWS Bedrock**
- Improved page load performance through **lazy loading, code splitting, and React Suspense** on larger, data-heavy applications

Rosys Virtual Solutions

July 2023 – Apr. 2024

Software Engineer

- Built and iteratively refined **object detection and facial recognition** models, benchmarking against baseline performance and **reducing false-positive rates** through continuous testing with the team
- Enhanced a real-time **Digital Twin Dashboard** for monitoring and visualizing **1500+** towers/sites
- Tuned front-end performance and SEO fundamentals, **cutting page load times**

PROJECTS

Miftah AI – AI Concierge & Operations Platform

React.js, FastAPI, AWS Bedrock, Chroma DB

- Built conversational AI interfaces for property discovery, travel planning, and personalized recommendations
- Wired up a **RAG pipeline** (FastAPI, Chroma DB, AWS Bedrock) so responses stay grounded in relevant context
- Built out CRM modules with role-based access, analytics dashboards, and map-based search using **Leaflet.js**

SellAnyHome.ai – Consumer Real Estate Platform

React.js, TypeScript, Tailwind CSS v4, Socket.io

- Built a consumer-facing real estate platform with a clean, responsive UI and **multi-step onboarding** that preserves progress across sessions
- Implemented **role-based access control** across several user types, with protected routes and permission-based rendering
- Added **real-time chat and notifications** with Socket.io; set up Vitest, ESLint, Husky, and GitHub Actions for testing and CI

Oyesell – B2B Sales Automation Platform

React.js, TypeScript, Tailwind CSS, Firebase

- Built a high-performance SaaS platform with a dynamic landing page featuring custom scroll animations, plus a comprehensive user dashboard
- Implemented secure authentication and protected routing with **Firebase**, using **TanStack Query** for efficient state management and data fetching
- Engineered a scalable component architecture with **Radix UI and Framer Motion**; set up Vite, Vitest, Playwright, and ESLint for testing and rapid iteration

EDUCATION

Vel Tech Rangarajan Dr. Sagunthala R&D Institute of Science and Technology
Bachelor of Information Technology

2018 – 2022
CGPA: 7.9

SKILL SET

Languages : JavaScript, TypeScript, Python, HTML/CSS

Databases : SQL (MySQL), NoSQL (MongoDB), ChromaDB, Vector Databases

Frontend : React.js, React Native, Tailwind CSS, Bootstrap, Responsive Web Design

Backend : Node.js, Express.js, FastAPI, RESTful APIs, Socket.io

Cloud & AI : AWS (S3, Bedrock), Firebase, RAG Pipelines, AI Application Development

Testing & CI/CD : Vitest, Playwright, ESLint, Husky, GitHub Actions

Tools : Git, GitHub, Postman, Linux
